5. Start the exam
6. Answer the questions
7. Exam rules (integrity)
8. Submit and see your result
9. If something goes wrong
10. English practice
11. Frequently asked questions

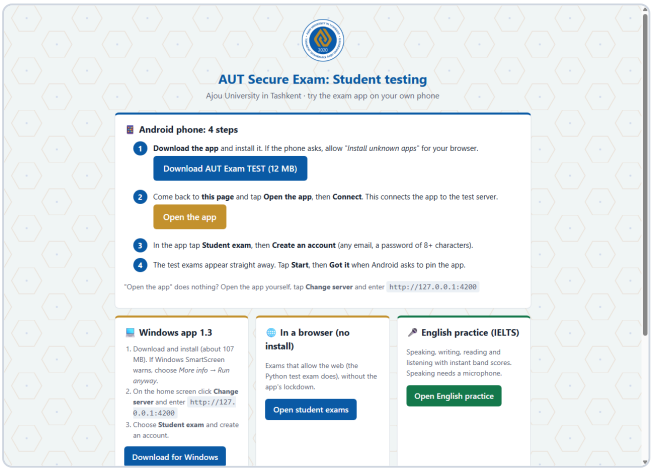

1. What you need

Device	App	Notes
Windows laptop or PC	**AUT Secure Exam** (Windows app)	Best for long exams and programming questions. Full-screen lockdown.
Android phone or tablet (Android 8+)	**AUT Secure Exam** (Android app)	The app pins itself to the screen during the exam.
Any browser	`https://exam.ajou.uz/student/`	Only for exams your professor allows on the web (no lockdown).

- A stable internet connection. A short drop is not a problem: answers are kept on your device and sent when the connection returns.
- Charge your device and turn on **Do Not Disturb**.
- Your university email and a password of at least 8 characters.

2. Install the app

Open **https://exam.ajou.uz/downloads/** on your device and choose your app.

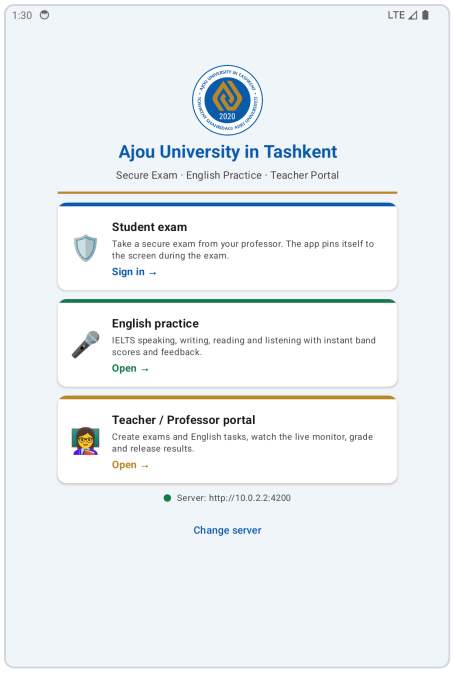

The download page. (During testing, your teacher may give you a test link instead.)

Android

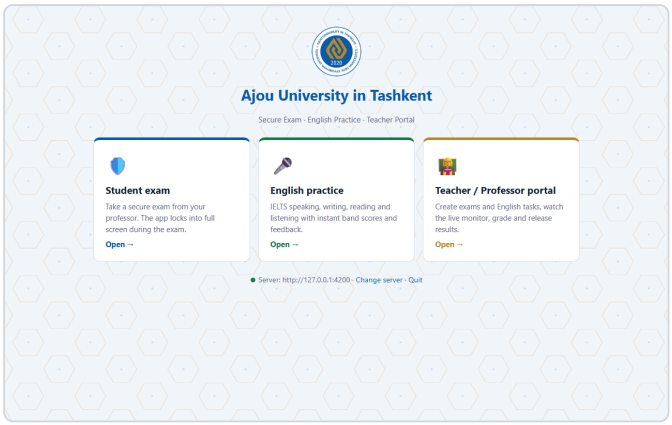

1. Tap **Download for Android**. When the phone asks, allow *Install unknown apps* for your browser.
2. Open the downloaded file and tap **Install**.
3. Open **AUT Secure Exam**. The home screen shows a **green dot** when the server is connected.
4. Test version only: tap **Open the app** on the test page, then **Connect**.

Windows

1. Click **Download for Windows** and run the installer. If Windows SmartScreen warns, choose *More info → Run anyway*.
2. Open **AUT Secure Exam** from the desktop.

Android: home screen

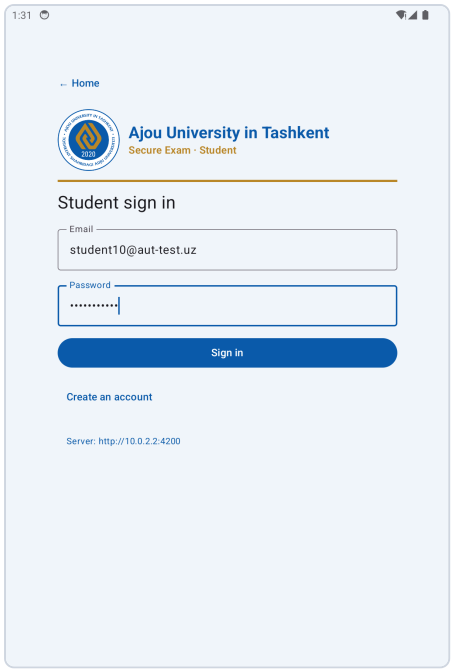

Windows: home screen

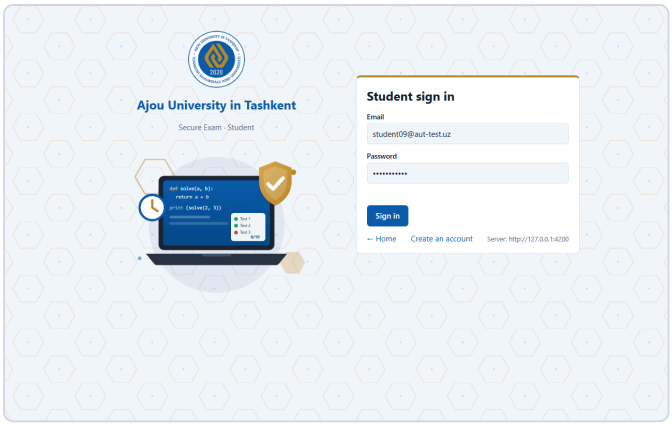

Both apps have the same three choices: **Student exam**, **English practice** and **Teacher / Professor portal** (for staff). The address of the server is shown at the bottom; you normally never need to change it.

3. Create an account or sign in

1. Tap **Student exam**.
2. First time: tap **Create an account**, enter your full name, student number, university email and a password (8+ characters), then **Create account**.
3. Next time: enter your email and password and tap **Sign in**.

Android: sign in

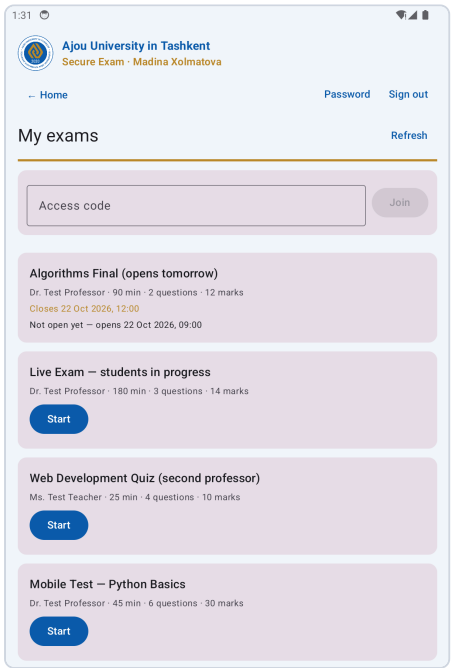

Windows: sign in

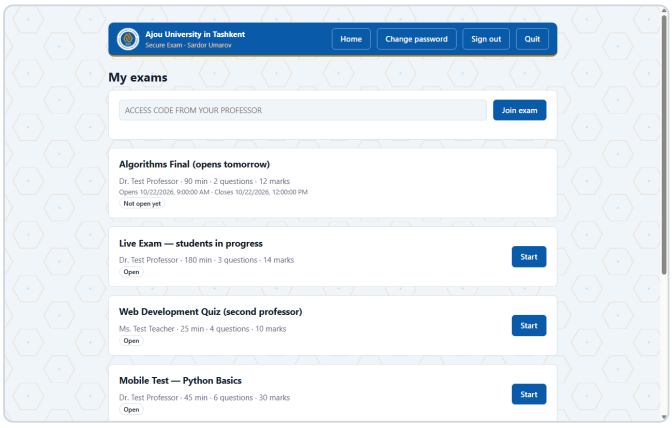

> After **10 wrong passwords** your account is locked for 15 minutes (this protects you from password guessing). Forgot your password? Ask your professor or the administrator to reset it. Use **Password** (Android) or **Change password** (Windows) on the exam list to change it; your other devices are then signed out.

4. Join an exam

Type the **access code** from your professor (for example `WCEJEC`) into the field at the top of **My exams** and tap **Join**. Exams your professor enrolled you in appear automatically.

Android: My exams

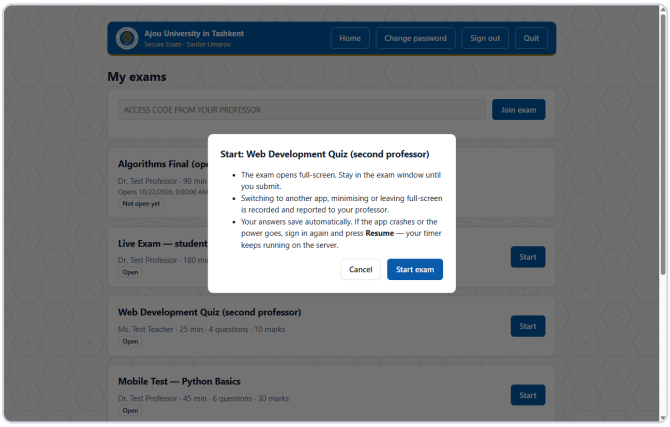

Windows: My exams

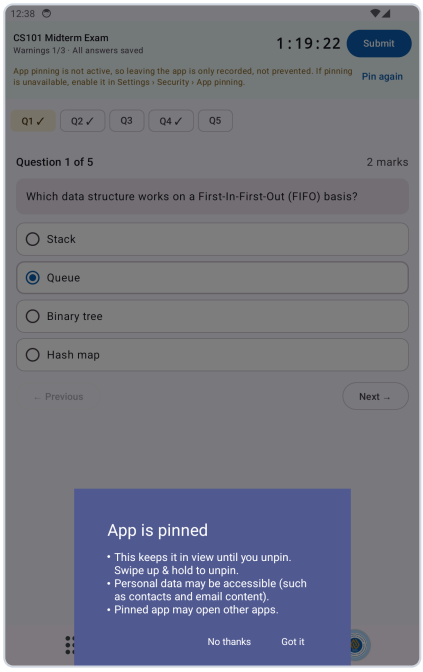

You see	Meaning
Start	The exam is open. You can start it.
Not open yet — opens …	Come back at the time shown.
Resume exam	You started but did not submit (for example the app closed). Your time kept running.
Submitted · awaiting results	Done. Your professor will release the results.
View result	Results are released.
Closed	The exam time is over.

5. Start the exam

1. Tap **Start**, read the rules, then **Start exam**.
2. **Android:** the phone asks to pin the app. Tap **Got it**. Do not tap "No thanks".
3. **Windows:** the exam opens full screen. Stay in the exam window until you submit.

Rules before you start

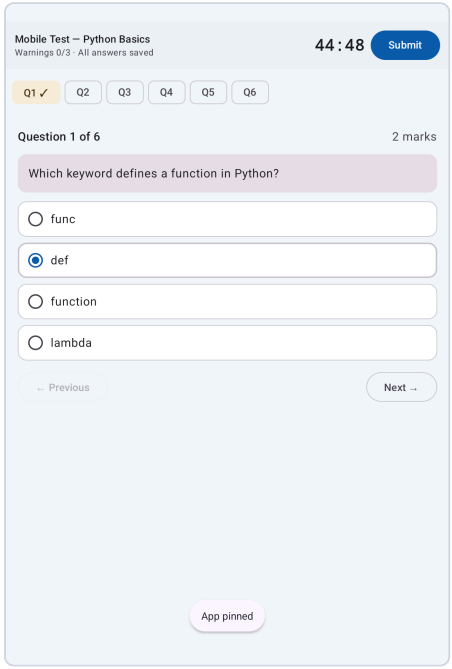

Android: tap Got it

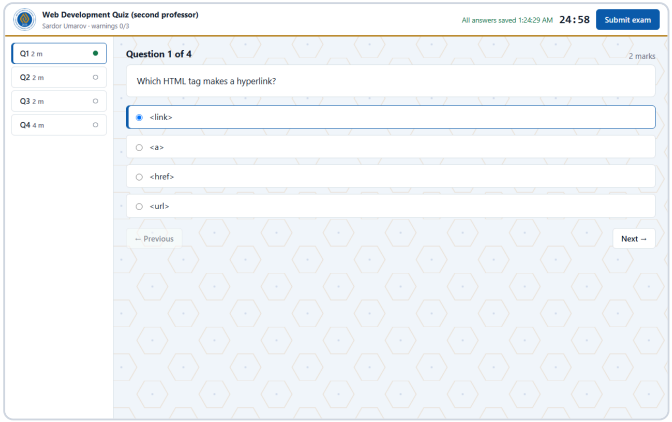

> The timer starts when you press **Start exam** and runs on the server. Closing the app does **not** stop it.

6. Answer the questions

- Use the question buttons at the top (**Q1, Q2 …**) or **Next / Previous**. A ✓ marks answered questions.
- **Multiple choice:** tap one option. **Written:** type your answer. **Programming:** write your program in the editor.
- Answers **save automatically** about one second after you change them. The top bar shows *All answers saved*.
- The timer turns red in the last 5 minutes.

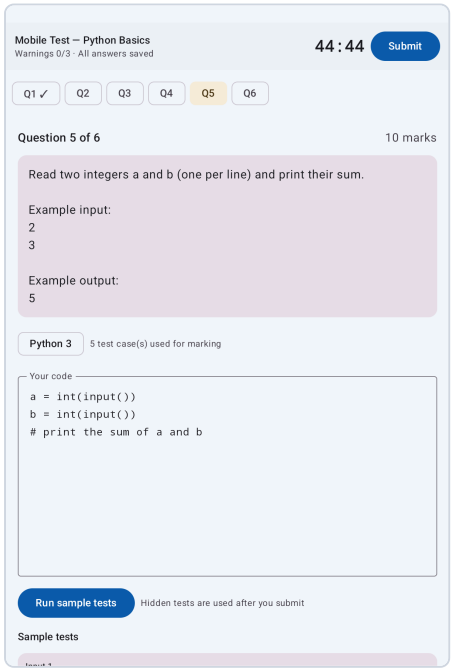

Android: multiple choice

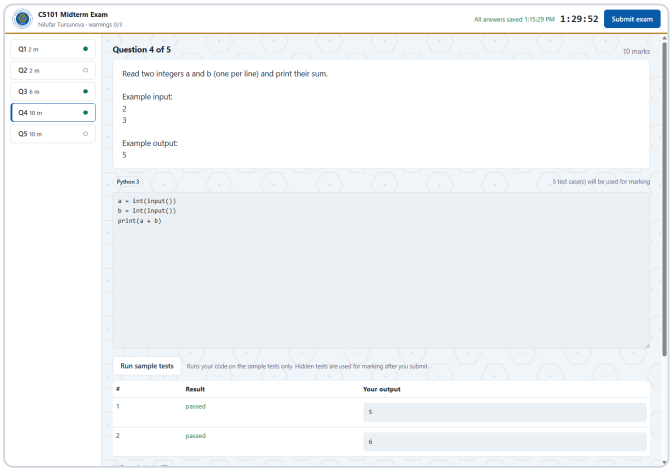

Windows: a question

Programming questions

Read the task and the **sample tests** (input and expected output). Tap **Run sample tests** to check your program. After you submit, hidden tests are also used for marking: each passed test earns its marks.

Android: programming question

Windows: sample tests passed

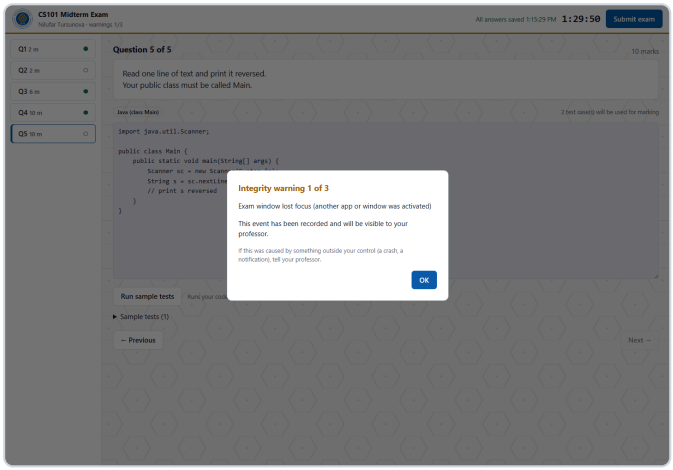

> On the test server, running code may be turned off: you can still write and submit it, and your professor marks it.

7. Exam rules (integrity)

These actions are recorded and reported to your professor, with the time:

- leaving the exam app or opening another app; switching windows (Windows);
- un-pinning the app, split-screen, pulling down the notification shade for a long time (Android);
- pasting text copied outside the exam (it is blocked).

You see a warning such as *Integrity warning 1 of 3*. Your professor decides what happens; some exams are **submitted automatically** after the last warning.

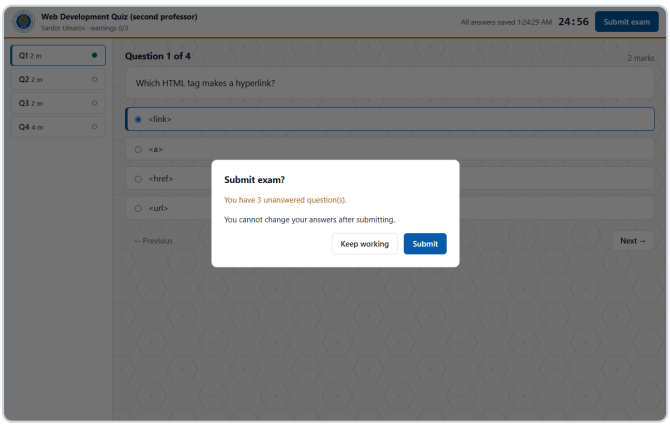

An integrity warning

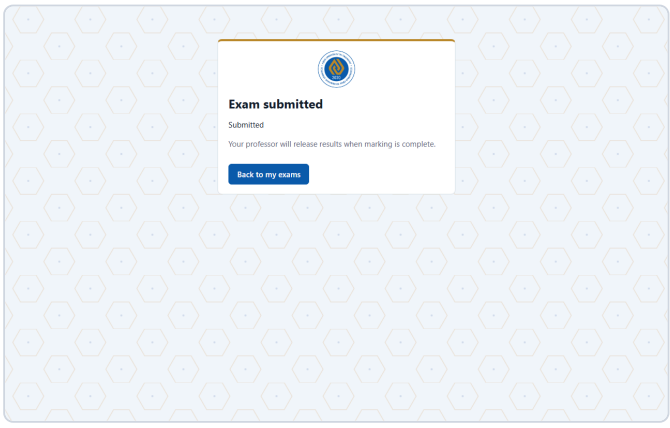

> If something outside your control happened (a phone call, a crash), tell your professor immediately after the exam.

8. Submit and see your result

1. Tap **Submit**. The app tells you how many questions are unanswered.
2. Tap **Submit** again to confirm. You cannot change answers afterwards.
3. When the time is up, the exam is submitted automatically with your saved answers.

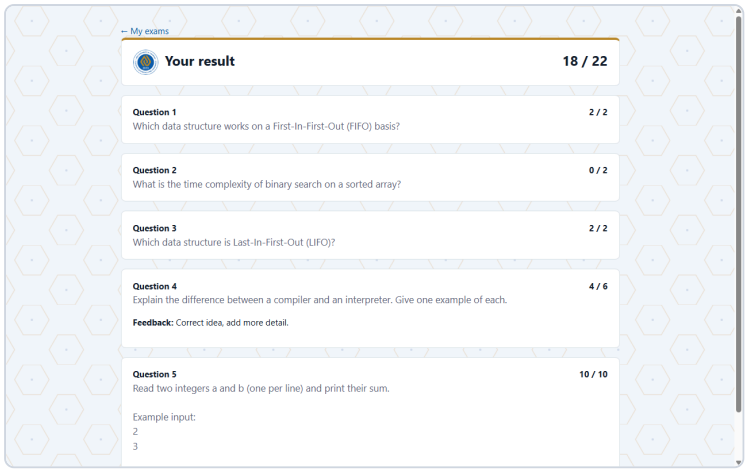

Confirm submission

Exam submitted

When your professor releases the results, **View result** appears on the exam: your score, the marks for each question, passed test cases and feedback.

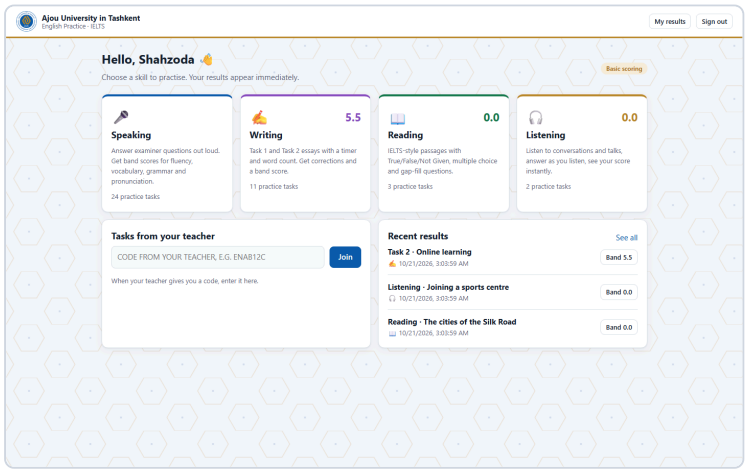

A released result

9. If something goes wrong

Problem	What to do
The app closed, the battery died or the PC restarted	Open the app, sign in, tap **Resume exam**. Your saved answers and the remaining time are kept on the server.
"Offline — keep working"	Keep answering. Answers are stored on your device and sent when the connection returns. Do not close the app.
Red dot on the home screen: "Server not reachable"	Check Wi-Fi or mobile data. The message under it says why (for example "address not found").
"Incorrect email or password"	Check the email (capital letters do not matter). After 10 tries wait 15 minutes, or ask for a password reset.
"This account is disabled"	Contact the administrator.
"Exam not found" when starting	Join with the access code first.
"This exam must be taken in the … app"	Your professor allowed only certain apps (for example Windows). Use that app.
Android: "App pinning is not active"	Tap **Pin again**. If pinning is off on the phone: Settings → Security → App pinning.
Windows SmartScreen blocks the installer	*More info* → *Run anyway*.
The app is stuck on a wrong server	Home → **Change server** → **Reset app** (Android) or enter the address your university gave you.

10. English practice

On the home screen, **English practice** opens IELTS speaking, writing, reading and listening practice with instant band scores. You are signed in with the same account. Choose a skill and a level (**Standard**, **Hard**, **Very hard**). Tasks marked **Exam** allow one attempt and show the result when your teacher releases it.

English practice

11. Frequently asked questions

Can I use my phone and my laptop? Yes, with the same account, but take each exam on one device.

Does the app record my screen or camera? No. It records only the events listed in section 7.

I lost the internet just before the end. Answers saved before the drop are kept; when the time is up the exam is submitted automatically with them. Tell your professor.

Can I take an exam twice? No. Your professor can reopen it if there was a technical problem.
